Statement re: RoUSA

On January 30th, 2024, community members were reminded that individuals willingly associating with BernardCaldwell and RichoCulture subject themselves to being sanctioned in accordance with the Moderation Guidelines. Community members were given a 24 hour amnesty period to come forward and declare any communication with BernardCaldwell or RichoCulture. We had hoped that this amnesty period would have ended the proxy involvement of these individuals within our community.

Unfortunately, this is far from the truth. Following an extensive investigation by Group Management and Senior Group Management, it is clear that there is still a high number of users within our community knowingly and willingly associating themselves with the RoUSA founders. We are continuing to receive credible reports of harassment, toxicity, doxing, cash bribery and interference.

These reports have been taken seriously and, despite several general community warnings, and general advice to the community to stay clear of these users and the RoUSA group, we have been left with no alternative but to take drastic action.

Starting Sunday, March 24th, we are implementing a **Group Blacklist** on RoUSA. This is a measure that we have not taken lightly. Any community member found to be a citizen, or serving in a civil office within RoUSA, will no longer be welcome here. That means you will not be able to participate in our elections, you will not be able to seek employment within any branch of government, you will not be able to sit on our Court or serve in Congress, and you will not be welcome to communicate in our Discord servers.

We believe that giving community members an opportunity to leave RoUSA and associated communications is fair. There will be no exemptions or exceptions granted to any community member.

This decision was made with your interests at the forefront. Your safety within our community is paramount, and the continued functioning of our community will not be interfered with by real-life thugs and toxic individuals.

To Bernard, Richo and the associated proxies, we say this: you are **not** welcome here.

Any attempt to subvert or attack our community from RoUSA will be forwarded directly to the appropriate entities such as ROBLOX/Discord and declared as targeted raids.

We welcome **all** tip offs in relation to individuals associated with these people, and encourage your candor and continued support during this paramount mark in our community's history.
