## Agenda Notification

Effective Immediately it is now mandatory to publish a **PDF that has been uploaded to Google Drive** of your agenda at least **one hour prior** to hosting a session, whether the session is on discord or in-game. This policy applies to **DC City Council, Senate & House of Representatives** and has been reintroduced to ensure transparency and prevent any concerns about post-session edits to the agenda.

## New Requirements:

### 1. Public Announcement:

Congressional agendas must be publicly posted in the Congressional Discord server, specifically in the “Voting Agendas” channel. Access to this channel will be granted to those responsible for posting agendas. DC City Council will utilize the “Agenda” channel within the District of Columbia Server.

### 2. Non-Deletion & Non-Editing:

Once posted, the agenda may not be deleted or edited. Any modification to the message will result in non-compliance with this directive.

### 3. Reporting Violations:

If you notice someone violating this directive, please file a report in the **Community Center Discord**, including evidence of the violation. Reports will be reviewed to ensure accountability.

## Consequences of Non-Compliance:

- Sessions without a properly announced agenda will be deemed unofficial.
- Any votes conducted during such sessions will be considered null and void.
- Numerous recurring infractions will result in possible moderation action if committed by the same person.

This policy will remain in effect until a more efficient system is implemented. Thank you for your understanding and cooperation as we strive to maintain transparency and accountability.

Thank You,
